

## HIGHLIGHTS of Accomplishment

### MEDICAL SERVICES

The Philippine Heart Center has been caring for the Filipino heart for three-and-a-half decades now. On our 35th year of quality and compassionate service, the PHC continues to be the leader in providing excellent and comprehensive cardiovascular care in the country.

As the demand for our services increase, we strive harder to provide our patients with a full-range of specialized care through facility and equipment upgrades. In 2009, our new facilities at the Annex Building became fully operational to accommodate and better serve our outpatients, especially those from the provinces. We have provided additional patient wards on the 3rd floor of our Medical Arts Building, in the areas vacated by the OutPatient Division, the Biological Laboratory, Peripheral Vascular Office, Blood Bank and OPD Dental Clinic.

Following are the major accomplishments in our various departments and laboratories from 2005 to 2009:
